

From the Author Of Prophecies with a Divine Answer!!!

There have been many books written on Prophetic writings (Nostradamus, Hopi Indians, Bible Code and many more) with so many interpretations and translations, why would anyone want to add to this list? The title of this book should be enough of a reason.

As a young child, I experienced my own visualizations of spirits (angels and ghosts/spirits of human form) also having an ability of being “Psychic.” But never knew of others with this ability and experiences with the other-side/spirits, until later in life.

Even though friends would ask me “are you Psychic?” With the religious teachings I was taught I never searched or delved into the true understanding of what “Psychic” fully meant, lost in a world of spiritual misunderstanding, as you might say. Then in 1984, I happen to watch a movie on Nostradamus. Like many who viewed this movie, I was intrigued by the future and of course that “Psychic” ability. But I figured at that moment, what could I do to help change the future for the better, and that I probably couldn’t be of help fully until after this event of New York City being bombed.

By the year 1995 some strange things took place in my life, that I proceeded to ask God some very important questions and would then receive an answer. This book explains how and when I received this answer. During 1996, an influx of information on Nostradamus and years after, even information on many other “Prophetic” writings. That by the year 2000 I was informed that I would soon be writing a book for all to read (this was said to me by what we call a spirit of very high order from the other-side). Then in 2002 I would sit down and begin to write this book. I give a clear understanding on many prophecies and also explain as to whom this spirit is (that gave me direction) that I have contact with and proof with a picture.

Isn’t there enough confusion and arguments over who has the right interpretation and correct answers to the future? With all of our gifted abilities and prophetic writings, why don’t we all come together and start using our abilities together to divert such disastrous events of our future. And bring peace and better the future of Mankind. After all this is and should be required of our future, for if not the prophecies of the future can be very real if no course of action is taken. But with the knowledge and information I have come across, we already have diverted a few of these prediction-prophecies over the past few years.

Some religions on this Earth say we cannot and shouldn’t try to change what has been written. This book explains that we do have that right to change our future for the better. Why it has even been written in prophetic writings that at this time Mankind will take this course of action, even though some might disagree with it.

Read this book to give you a better understanding of what our future is and what gives me the right to speak and write about prophecy.
